ACTIVITY 6 – FUTURISTIC SCHOOLS. Read the text.

Imagine SCHOOLS IN 2050

Schools will be very different in 2050. Students will probably use virtual reality glasses during their classes. Instead of reading only traditional books, they will visit historical places, explore planets and study inside virtual laboratories.

Teachers will continue to be important, but technology will help them create more interactive lessons. Some classrooms will have artificial intelligence assistants that will answer students' questions.

Students won't always have to sit at desks. They will sometimes learn outdoors, in laboratories or even from home. However, students will still need to communicate and work with their classmates.

If schools use technology responsibly, students will have many opportunities to learn. However, if students depend too much on technology, they may have problems developing some social skills.

Answer the questions in English.

1. How will schools be different in 2050?

2. What will students use during some classes?

3. Will teachers disappear?

4. What will artificial intelligence assistants do?

5. Where will students sometimes learn?

6. What will happen if schools use technology responsibly?
